Abstract: With the progress of the times and the continuous improvement of medical technology, the types of clinical drugs are increasing. Rational drug use can ensure the treatment efficiency of patients, improve the quality of life, and provide a good treatment environment for the majority of patients. Therefore, special attention should be paid to the safety and rationality of drugs. Next, this paper will conduct an in-depth study on the safety and measures of clinical rational drug use based on the national drug bidding and procurement policy.
